chromed iron structure
transparent or colored crystal

Nevea square

2025

Nevea is a chandelier composed of crystal chains of different lengths, arranged to evoke the beauty of ice stalactites hanging downwards. The tapered and elongated shapes of the chains recall the delicacy and transparency of ice, while their irregular arrangement gives a sense of movement and fluidity, as if the chandelier were in continuous evolution. The light, which filters through the crystals, disperses into a thousand facets, creating a magical and enchanting atmosphere.
